

Product Backlog - Artisan Store

Project: Web platform for artisan store (Wood, Ceramic, Amigurumis)

Objective: Enable customers to view products and place orders online

Total Stories: 18 | **Total Epics:** 5 | **Business Rules:** 10

EPIC 01: Product Catalog

US-01: View products by category

Priority: High | **Story Points:** 8 | **Sprint:** S1

Description: As a customer, I want to see all available products separated by category (Wood, Ceramic, Amigurumis) with filters so I can easily find what I'm looking for.

Business Rules: BR-01, BR-02

Acceptance Criteria:

- The catalog displays 3 distinct categories
- Products can be filtered by category
- Only products with "Active" status appear
- The interface is responsive and navigable

US-02: View product details

Priority: High | **Story Points:** 5 | **Sprint:** S1

Description: As a customer, I want to see the complete details of a product (photo, description, price, stock availability, if it allows customization) so I can decide if I want to order it.

Business Rules: BR-03

Acceptance Criteria:

- Name, description, and price are displayed
- Stock quantity is indicated
- Customization availability is shown
- Price must be greater than \$0

US-03: Photo gallery

Priority: Medium | **Story Points:** 3 | **Sprint:** S1

Description: As a customer, I want to see a photo gallery of each item to appreciate the details of the artisan work.

Business Rules: BR-03

Acceptance Criteria:

- Each product has at least 1 photo
 - Users can navigate between photos
 - Photos are displayed in good resolution
-

EPIC 02: Order Management

US-04: Place an order

Priority: High | **Story Points:** 8 | **Sprint:** S1

Description: As a customer, I want to place an order with one or several products, providing my contact information (name, email, phone, address, province) so the business can coordinate delivery.

Business Rules: BR-05, BR-07

Acceptance Criteria:

- Order requires a minimum of 1 item
- Complete information is captured: name, email, phone, address, province
- All required fields are validated
- Order total plus shipping is calculated

US-05: Calculate shipping cost

Priority: High | **Story Points:** 5 | **Sprint:** S2

Description: As a customer, I want an additional shipping cost to be automatically calculated if my province is different from the business's province.

Business Rules: BR-07

Acceptance Criteria:

- If customer's province $\neq$ business's province $\rightarrow$ adds extra cost
- Shipping cost is configured from admin panel
- Shipping cost is shown itemized in order summary

US-06: Reference number

Priority: High | **Story Points:** 3 | **Sprint:** S1

Description: As a customer, I want to receive a unique reference number for each order so I can track it.

Business Rules: BR-06

Acceptance Criteria:

- A unique number is automatically generated
- Number is sent to customer via email
- Number is stored in the database
- Number is non-repeatable

US-07: Check order status

Priority: Medium | **Story Points:** 5 | **Sprint:** S2

Description: As a customer, I want to check my order status by entering my reference number to know what stage it's in (confirmed, paid, processing, ready, delivered).

Business Rules: BR-06

Acceptance Criteria:

- Orders can be searched by reference number
- Status states are displayed: confirmed, paid, processing, ready, delivered
- Date of each status change is shown
- Only the order's customer can view it

US-08: Validate available stock

Priority: High | **Story Points:** 3 | **Sprint:** S1

Description: As a system, I want to validate that orders cannot be placed for products with stock = 0.

Business Rules: BR-04

Acceptance Criteria:

- If stock = 0, the product appears as "Out of Stock"
- Cannot add out-of-stock items to order
- Message indicating the reason is displayed

EPIC 03: Customized Orders

US-09: Request customization

Priority: Medium | **Story Points:** 8 | **Sprint:** S2

Description: As a customer, I want to request a customization based on an existing product, indicating changes such as color, size, personalized message.

Business Rules: BR-08

Acceptance Criteria:

- Only products marked as "Allows customization" can be customized
- Customization option is clearly indicated in the form
- Required details are captured
- Order is recorded as customized

US-10: Approve customized order

Priority: High | **Story Points:** 8 | **Sprint:** S2

Description: As an administrator, I want to review all customized orders, request more details if necessary, set a final price, and approve or reject.

Business Rules: BR-08

Acceptance Criteria:

- Admin sees a panel of pending customized orders
 - Can approve or reject orders
 - Can set a different price if needed
 - Customer is notified of the decision
 - If approved, it enters the normal order flow
-

EPIC 04: Customer Registration and Profile

US-11: Register

Priority: High | **Story Points:** 5 | **Sprint:** S1

Description: As a visitor, I want to register with email and password to save my orders and contact information.

Acceptance Criteria:

- Email, password, and confirmation are captured
- Email is validated as unique
- Password is encrypted
- Confirmation email is sent
- User can log in

US-12: View order history

Priority: Medium | **Story Points:** 5 | **Sprint:** S2

Description: As a registered customer, I want to view the history of all my previous orders and their statuses to review my purchases.

Acceptance Criteria:

- All customer orders are listed
- Date, status, total, and reference number are displayed
- Orders can be filtered by status or date
- Detail of each order is accessible

US-13: Update profile

Priority: Low | **Story Points:** 3 | **Sprint:** S3

Description: As a registered customer, I want to update my contact information and delivery address to keep my profile current.

Acceptance Criteria:

- Name, email, phone, and address can be edited
 - Changes are saved to the database
 - Email must be unique if changed
-

EPIC 05: Admin Dashboard

US-14: Manage products

Priority: High | **Story Points:** 8 | **Sprint:** S1

Description: As an administrator, I want to create, edit, and delete products from the catalog to keep it updated.

Business Rules: BR-10, BR-03

Acceptance Criteria:

- New products can be created with all required fields
- Existing products can be edited
- Products can be deleted (soft delete)
- Status can be changed (Active/Inactive)
- Can mark if "Allows customization"
- All required fields are validated

US-15: View and change order status

Priority: High | **Story Points:** 8 | **Sprint:** S2

Description: As an administrator, I want to see all received orders and change their status (confirmed, paid, processing, ready, delivered) to manage production.

Business Rules: BR-09

Acceptance Criteria:

- All orders are listed with reference number
- Details of each order can be viewed
- Status can be manually changed
- When marked as "Paid", order enters production
- Customer is notified of status changes
- Date and time of each change is shown

US-16: Update stock

Priority: High | **Story Points:** 5 | **Sprint:** S1

Description: As an administrator, I want to update the stock of each product so customers can only order available items.

Business Rules: BR-10

Acceptance Criteria:

- Stock quantity can be edited for each product
- Current stock is easily visualized
- Quick product search is available
- Changes are immediately reflected in the catalog

US-17: Configure shipping

Priority: Medium | **Story Points:** 5 | **Sprint:** S2

Description: As an administrator, I want to configure the business's base province and the additional shipping cost per province.

Business Rules: BR-07

Acceptance Criteria:

- Base province can be set
- Shipping cost can be defined for each different province
- Existing costs can be edited
- Changes apply immediately to new orders

US-18: View sales report

Priority: Low | **Story Points:** 5 | **Sprint:** S3

Description: As an administrator, I want to see a summary of sales and orders by period to make production decisions.

Acceptance Criteria:

- Total orders by period are displayed
- Total revenue is shown
- Can filter by date
- Breakdown by category is displayed
- Most sold products are shown

Business Rules

Code	Rule	Application
BR-01	Products must belong to one of 3 categories: Wood, Ceramic, or Amigurumis	Catalog
BR-02	Only products with "Active" status are visible in the catalog	Catalog
BR-03	Product requires: name, description, price (>\$0), minimum 1 photo, and category	Catalog
BR-04	Orders cannot be placed for products with stock = 0 (but customer can reserve)	Orders / Inventory
BR-05	Order must contain minimum 1 item and all customer contact information (name, email, phone, address)	Orders
BR-06	Every order generates a unique reference number for tracking	Orders
BR-07	If customer is in a different province, an additional shipping cost is added	Orders / Shipping
BR-08	Customized orders must be approved by the seller before confirming final price	Customized Orders

Code	Rule	Application
BR-09	Seller must mark order as "Paid" for it to enter production	Production Flow
BR-10	Only admin can create, edit, or delete products and update stocks	Admin

Backlog Summary

Metric	Value

Medium Priority Stories	5
Low Priority Stories	2
Estimated Sprints	3

Sprint Roadmap

Sprint 1 (Catalog + Basic Orders)

- US-01: View products by category
- US-02: View product details
- US-03: Photo gallery
- US-04: Place an order
- US-06: Reference number
- US-08: Validate stock
- US-11: Register

- US-14: Manage products
- US-16: Update stock **Total: 45 pts**

Sprint 2 (Shipping + Customizations + Admin)

- US-05: Calculate shipping cost
- US-07: Check order status
- US-09: Request customization
- US-10: Approve customized order
- US-12: View order history
- US-15: View and change order status
- US-17: Configure shipping **Total: 39 pts**

Sprint 3 (Refinement + Reports)

- US-13: Update profile
 - US-18: View sales report **Total: 8 pts**
-

Important Notes

1. **Payment:** Does not include a payment gateway. Customer places order and admin marks as paid manually.
 2. **Communication:** Does not include in-app messaging system. Admin and customer communicate outside the platform.
 3. **Authentication:** Basic login/register system with encrypted passwords is required.
 4. **Database:** Will require tables for: Users, Products, Orders, OrderDetails, Categories, Configuration.
 5. **Scalability:** Designed for small to medium-sized business.
-

Definitions

Term	Definition
Story Point	Unit of measure for effort estimation
User Story	Feature from user perspective
Acceptance Criteria	Conditions that must be met for story completion

Term	Definition
Business Rule	Constraint or requirement for system behavior
Epic	Large feature containing multiple stories
Sprint	Fixed time period (1-2 weeks) for development
